

## **REDEVELOPING A DISTRICT-SCALE CRITICAL METALS CAMP**

**TSX-V: NEXM | NASDAQ: NEXM**  
**[nexmetalsmining.com](https://www.nexmetalsmining.com)**

APRIL 2026 | INVESTOR PRESENTATION

# CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This presentation (the "Presentation") is to be used by the recipient for informational purposes only and does not purport to be complete or contain all of the information that may be material to the current or future business, operations, financial condition or prospects of NexMetals Mining Corp. ("NEXM" or the "Company"). Each recipient should perform its own independent investigation and analysis of NEXM and the information contained in this Presentation is not a substitute therefor. NEXM makes no representation or warranty, express or implied, as to the accuracy or completeness of the information contained in this Presentation or in any other written or oral communication transmitted to any recipient by any party. By accepting this Presentation, the recipient agrees that neither NEXM nor any of its officers, directors, employees or representatives has any liability for any representations or warranties, express or implied, contained in, or for any omissions from, this Presentation or any such other written or oral communication from any person. This Presentation is confidential and may not be reproduced, in whole or in part, in any form or forwarded or further disseminated to any other person. Any forwarding, distribution or reproduction of this Presentation in whole or in part is unauthorized. By accepting and reviewing this Presentation, you acknowledge and agree (i) to maintain the confidentiality of this Presentation, and the information contained herein, (ii) to protect such information in the same manner you protect your own confidential information, which shall be at least a reasonable standard of care, and (iii) to not utilize any of the information contained herein except to assist with your evaluation of the Company.

Certain information contained herein is based on, or derived from, information provided by independent third-party sources. NEXM believes that such information is accurate and that the sources from which it has been obtained are reliable, however, NEXM has not independently verified such information and does not assume any responsibility for the accuracy or completeness of such information.

This Presentation should not be considered as a recommendation from any person to purchase any securities. Each person for whom this Presentation is made available should consult its own professional advisors in making its own independent investigations and assessment and, after making such independent investigations and assessments, as it deems necessary, in determining whether to proceed with any investment in the Company.

Some of the statements and information contained in this Presentation, including those relating to the Company's model, expectations, forecasts, opportunity, strategy and other statements, are forward-looking statements or forward-looking information within the meaning of applicable securities laws and are referred to herein as "forward-looking statements" within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1985. All statements, other than statements of historical fact, are forward-looking statements and based upon expectations, estimates and projections as at the date of this Presentation. Often, but not always, forward-looking statements can be identified by the use of words such as "may", "will", "expect", "believe", "anticipate", "illustrate" or the negative of these terms or variations of them or similar terminology. In this Presentation, forward-looking statements relate, among other things, to: prospects, projections and success of the Company and its projects, estimates related to future global copper supply and demand and related macroeconomic conditions, the ability of the Company to further delineate and increase National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") compliant mineral resource estimates and the use of historic data in evaluating the Company's Selebi and Selkirk mines and related infrastructure (the "Selebi Project" and the "Selkirk Project", respectively) located in Botswana, the Company's planned exploration programs, drilling programs, development and redevelopment goals, plans to advance updated technical reports, preliminary economic assessments and pre-feasibility studies under NI 43-101 related to the potential of re-developing, on an accelerated basis, the Selebi and Selkirk mines including construction of a smelter or hydrometallurgy plant on its properties and the estimates of costs and capital requirements in relation thereto, the Company's potential use of XRT ore sorting, the potential employment opportunities associated with a mine restart, and future opportunities for exploration and growth of additional mineral projects. Forward-looking statements reflect the Company's current expectations, forecasts and projections with respect to future events, many of which are beyond the Company's control, and are based on certain assumptions, including, without limitation, with respect to general economic, market and business conditions and are subject to change. Forward-looking statements involve significant risks and uncertainties and should not be read as guarantees of future performance or results. While the Company believes the forward-looking statements contained herein to be reasonable, many factors, known and unknown, may cause actual results and events to be materially different from those expressed or implied by such forward-looking statements, including but not limited to risks relating to exploration activities (including drill results) and the ability to accurately predict mineralization, the ability of the Company to complete further exploration activities, economic uncertainty and related economic factors, including changes in equity markets, inflation, and fluctuations in commodity prices, risks relating to mining activities, changes in international, national and local government, legislation, controls, regulations and political or economic developments, risks and hazards associated with the business of mineral exploration, development and mining, relationships with local stakeholders, and the speculative nature of mineral exploration and development (including the risks of obtaining or maintaining necessary licenses, permits and approvals from government authorities). Recipients are cautioned that forward-looking statements are not guarantees of future performance. The Company cannot assure recipients that actual results will be consistent with these forward-looking statements and recipients should not place undue reliance on forward-looking statements due to the inherent uncertainty therein.

For additional information with respect to these and other factors and assumptions underlying the forward-looking statements made herein concerning the Company, please refer to the public disclosure record of the Company, including the most recent annual and interim financial statements and related management's discussion and analysis of the Company (and its predecessors), which are available on SEDAR+ ([www.sedarplus.ca](http://www.sedarplus.ca)) under NEXM's issuer profile.

The recipient agrees and acknowledges that neither NEXM nor any of its representatives is under any obligation whatsoever to update or keep current the information contained herein at any time and the Company hereby disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by law.

This Presentation does not constitute an offer to sell or a solicitation to buy any securities in the United States or any jurisdiction. No securities may be offered in the United States or any other jurisdiction in which such offer or sale would be unlawful prior to registration under the U.S. Securities Act of 1933, as amended or an exemption therefrom or qualification under the securities laws of such other jurisdiction or an exemption therefrom.

All references to dollar amounts in this Presentation are to Canadian dollars unless otherwise specified.

# IMPORTANT CAUTIONARY AND OTHER INFORMATION

## Caution Regarding Historic Data

Certain scientific and technical information in this Presentation, including historic data compilation at the Selebi and Selkirk projects, are historic in nature. Reference should be made to the full text of the Selebi Technical Report (as defined herein) and the Selkirk Technical Report (as defined herein) for the assumptions, limitations and data verification relating to the historic data compilation presented in this Presentation, which are available electronically on SEDAR+ ([www.sedarplus.ca](http://www.sedarplus.ca)) under NEXM's issuer profile. The work undertaken by the Company, SLR Consulting (Canada) Ltd., and G Mining Services Inc., to verify the historic data compilation are further described in the Selebi Technical Report and the Selkirk Technical Report. While (i) visual estimates of oxidized sulphides appear to correlate well with logged intercepts and analytical values, and (ii) analytical values compared between the logs and the digital database appear to compare well, the technical team continues to collect, compile, review and validate historic technical data relevant to the project. To that end, the Selebi Mines and Selkirk Technical Reports recommends continued compilation and verification to confirm that the QA/QC program results are adequate to support the inclusion of the historical drill hole information in future mineral resource estimates in accordance with NI 43-101.

## Selebi Technical Report

The scientific and technical information in this Presentation relating to the Selebi project is supported by the technical report entitled "NI 43-101 Technical Report, Selebi Mines, Central District, Republic of Botswana" Technical Report dated September 20, 2024 (with an effective date of June 30, 2024) (the "Selebi Technical Report") and prepared by SLR Consulting (Canada) Ltd. for NEXM. Reference should be made to the full text of the Selebi Technical Report, which was prepared in accordance with NI 43-101 and is available on SEDAR+ ([www.sedarplus.ca](http://www.sedarplus.ca)) under NEXM's issuer profile.

## Selkirk Technical Report

The scientific and technical information in this Presentation relating to the Selkirk project is supported by the technical report entitled "NI 43-101 Technical Report Selkirk Nickel Project, North East District, Republic of Botswana", dated January 8, 2025 (with an effective date of November 1, 2024) (the "Selkirk Technical Report") prepared by SLR Consulting (Canada) Ltd. for NEXM. Reference should be made to the full text of the Selkirk Technical Report, which was prepared in accordance with NI 43-101, and available on SEDAR+ ([www.sedarplus.com](http://www.sedarplus.com)) under NEXM's issuer profile.

## Property Acquisition Terms

Pursuant to the Selebi APA, the aggregate purchase price payable to the seller for the Selebi Mines shall be the sum of US\$56,750,000, which amount shall be paid in three installments: i. US\$1,750,000 payable on the closing date, and payment of care and maintenance funding contributions in respect of the Selebi Mines from March 22, 2021 to the closing date of US\$5,178,747. These payments have been made; ii. US\$25,000,000 payable upon the approval by the Botswana Ministry of Mineral Resources, Green Technology and Energy Security ("MMRGTES") of the Company's Section 42 and Section 43 applications (for the further extension of the mining license and amendment of mining programme, respectively). The Company has pre-paid this amount; and iii. US\$30,000,000 payable on the earlier of completion of mine construction and production start-up (commissioning) by the Company, or December 1, 2029. For more information regarding the agreed purchase price and installment payment terms related to the Selebi Mines acquisition, please refer to the Company's latest financial statements and MD&A available on our website <https://nexmetalsmining.com/investors/financial-statements/>.

## QA/QC

The 2025 Selebi drilling programs were carried out using company owned drills through an agreement with Forage Fusion Drilling Ltd. of Hawkesbury, Ontario, Canada, who are providing training of local operators. The underground drilling program was carried out with Zinex U-5 drills. Drill core size was BQTK (40.7 mm diameter). Surface drilling is being carried out using three converted Zinex U5s and a Marcotte HTM2500. Surface drill core size is either NQ (47.6 mm diameter) or BQ (36.40 mm diameter). Samples are generally 1.0 to 1.5 metre intervals or less at the discretion of the site geologists. Sample preparation and lab analysis was completed at ALS Geochemistry in Johannesburg, South Africa. Commercially prepared Blank samples and certified Cu/Ni sulphide analytical control standards with a range of grades are inserted in every batch of 20 samples or a minimum of one set per sample batch. Analyses for Ni, Cu and Co are completed using a peroxide fusion preparation and ICP-AES finish (ME-ICP81). Analyses for Pt, Pd, and Au are by fire assay (30 grams nominal sample weight) with an ICP-AES finish (PGM-ICP23).

Drilling on the Selkirk Project was completed by Discovery Drilling using a Boyles 56 machine. Drill core is HQ (63.5 mm diameter) size. Samples were sawn to produce quartered core. The quartered core samples submitted to the lab were generally 1 metre in length. Re-sampling of historic drill core (NQ: 47.6 mm diameter) is ongoing. Samples submitted to the lab were half core and generally 1 meter in length. Sample preparation and lab analysis of both new core and resampled core was completed at ALS Chemex in Johannesburg, South Africa. Commercially prepared blank samples and certified Cu/Ni sulphide analytical control standards with a range of grades are inserted in every batch of 20 samples or a minimum of one set per sample batch. Analyses for Ni, Cu and Co are completed using a peroxide fusion preparation and ICP-AES finish (ME-ICP81). Analyses for Pt, Pd, and Au are by fire assay (30 grams nominal sample weight) with an ICP-AES finish (PGM-ICP23).

## Qualified Persons

All scientific and technical information in this Presentation has been reviewed and approved by Sharon Taylor, VP Geophysics of the Company, MSc, P.Geo, whom is a "qualified person" for the purposes of NI 43-101.

# SCALABLE GROWTH IN MINING-FRIENDLY BOTSWANA

## PAST-PRODUCING & PERMITTED Cu-Ni-Co-PGE MINES

Selebi: 3.0 Mt @ 2.92% CuEq (Ind) and 24.7 Mt @ 3.40% CuEq (Inf)<sup>1</sup>  
Selkirk: 44.2 Mt @ 0.81% CuEq (Inf)<sup>2</sup>

## CLEAR UPSIDE TO SCALE

Step-out drilling and emerging Flexure Zone point to meaningful resource growth potential

## EXISTING INFRASTRUCTURE ADVANTAGE

Strategically located projects 75 km apart within an established mining camp, with shafts, power, water, and rail in place

## METALLURGICAL UPSIDE

Unlocking separate high-grade Cu & Ni-Co concentrate production

## TOP MINING JURISDICTION IN AFRICA - BOTSWANA

Ranked #1 in Africa, and 7<sup>th</sup> globally<sup>3</sup> with stable democracy and mining laws aligned with Canadian standards

## PROVEN TEAM & STRONG BACKING

Experienced operators with strong institutional support

BOTSWANA

Selkirk Mine

Selebi Mines

**BOTSWANA**

# AFRICA'S MOST ATTRACTIVE MINING JURISDICTION

**#1 IN AFRICA, #7 GLOBALLY — FRASER INSTITUTE (2025)**

## **LOW RISK JURISDICTION**

Long history of rule-of-law, competitive tax rates, no foreign exchange restrictions, and no required government free carry.

## **STABLE POLITICAL ENVIRONMENT**

Botswana has long had a stable political system with low corruption, which is crucial for investor confidence.

## **MINING INFRASTRUCTURE**

Botswana has well-developed mining infrastructure, including road networks, and access to power, facilitating smooth mining operations.

## **ATTRACTIVE LEGAL & REGULATORY FRAMEWORK**

Botswana offers a predictable mining regulatory environment, with clear ownership rights and a history of legal stability in mining.

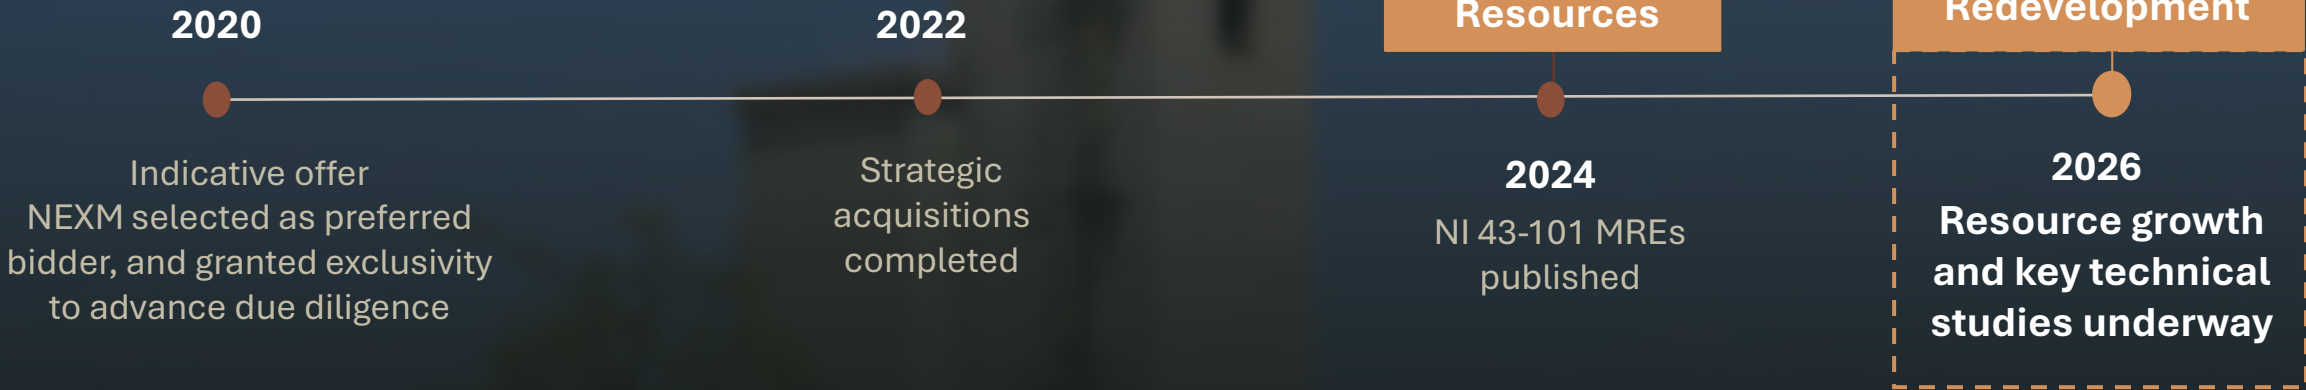

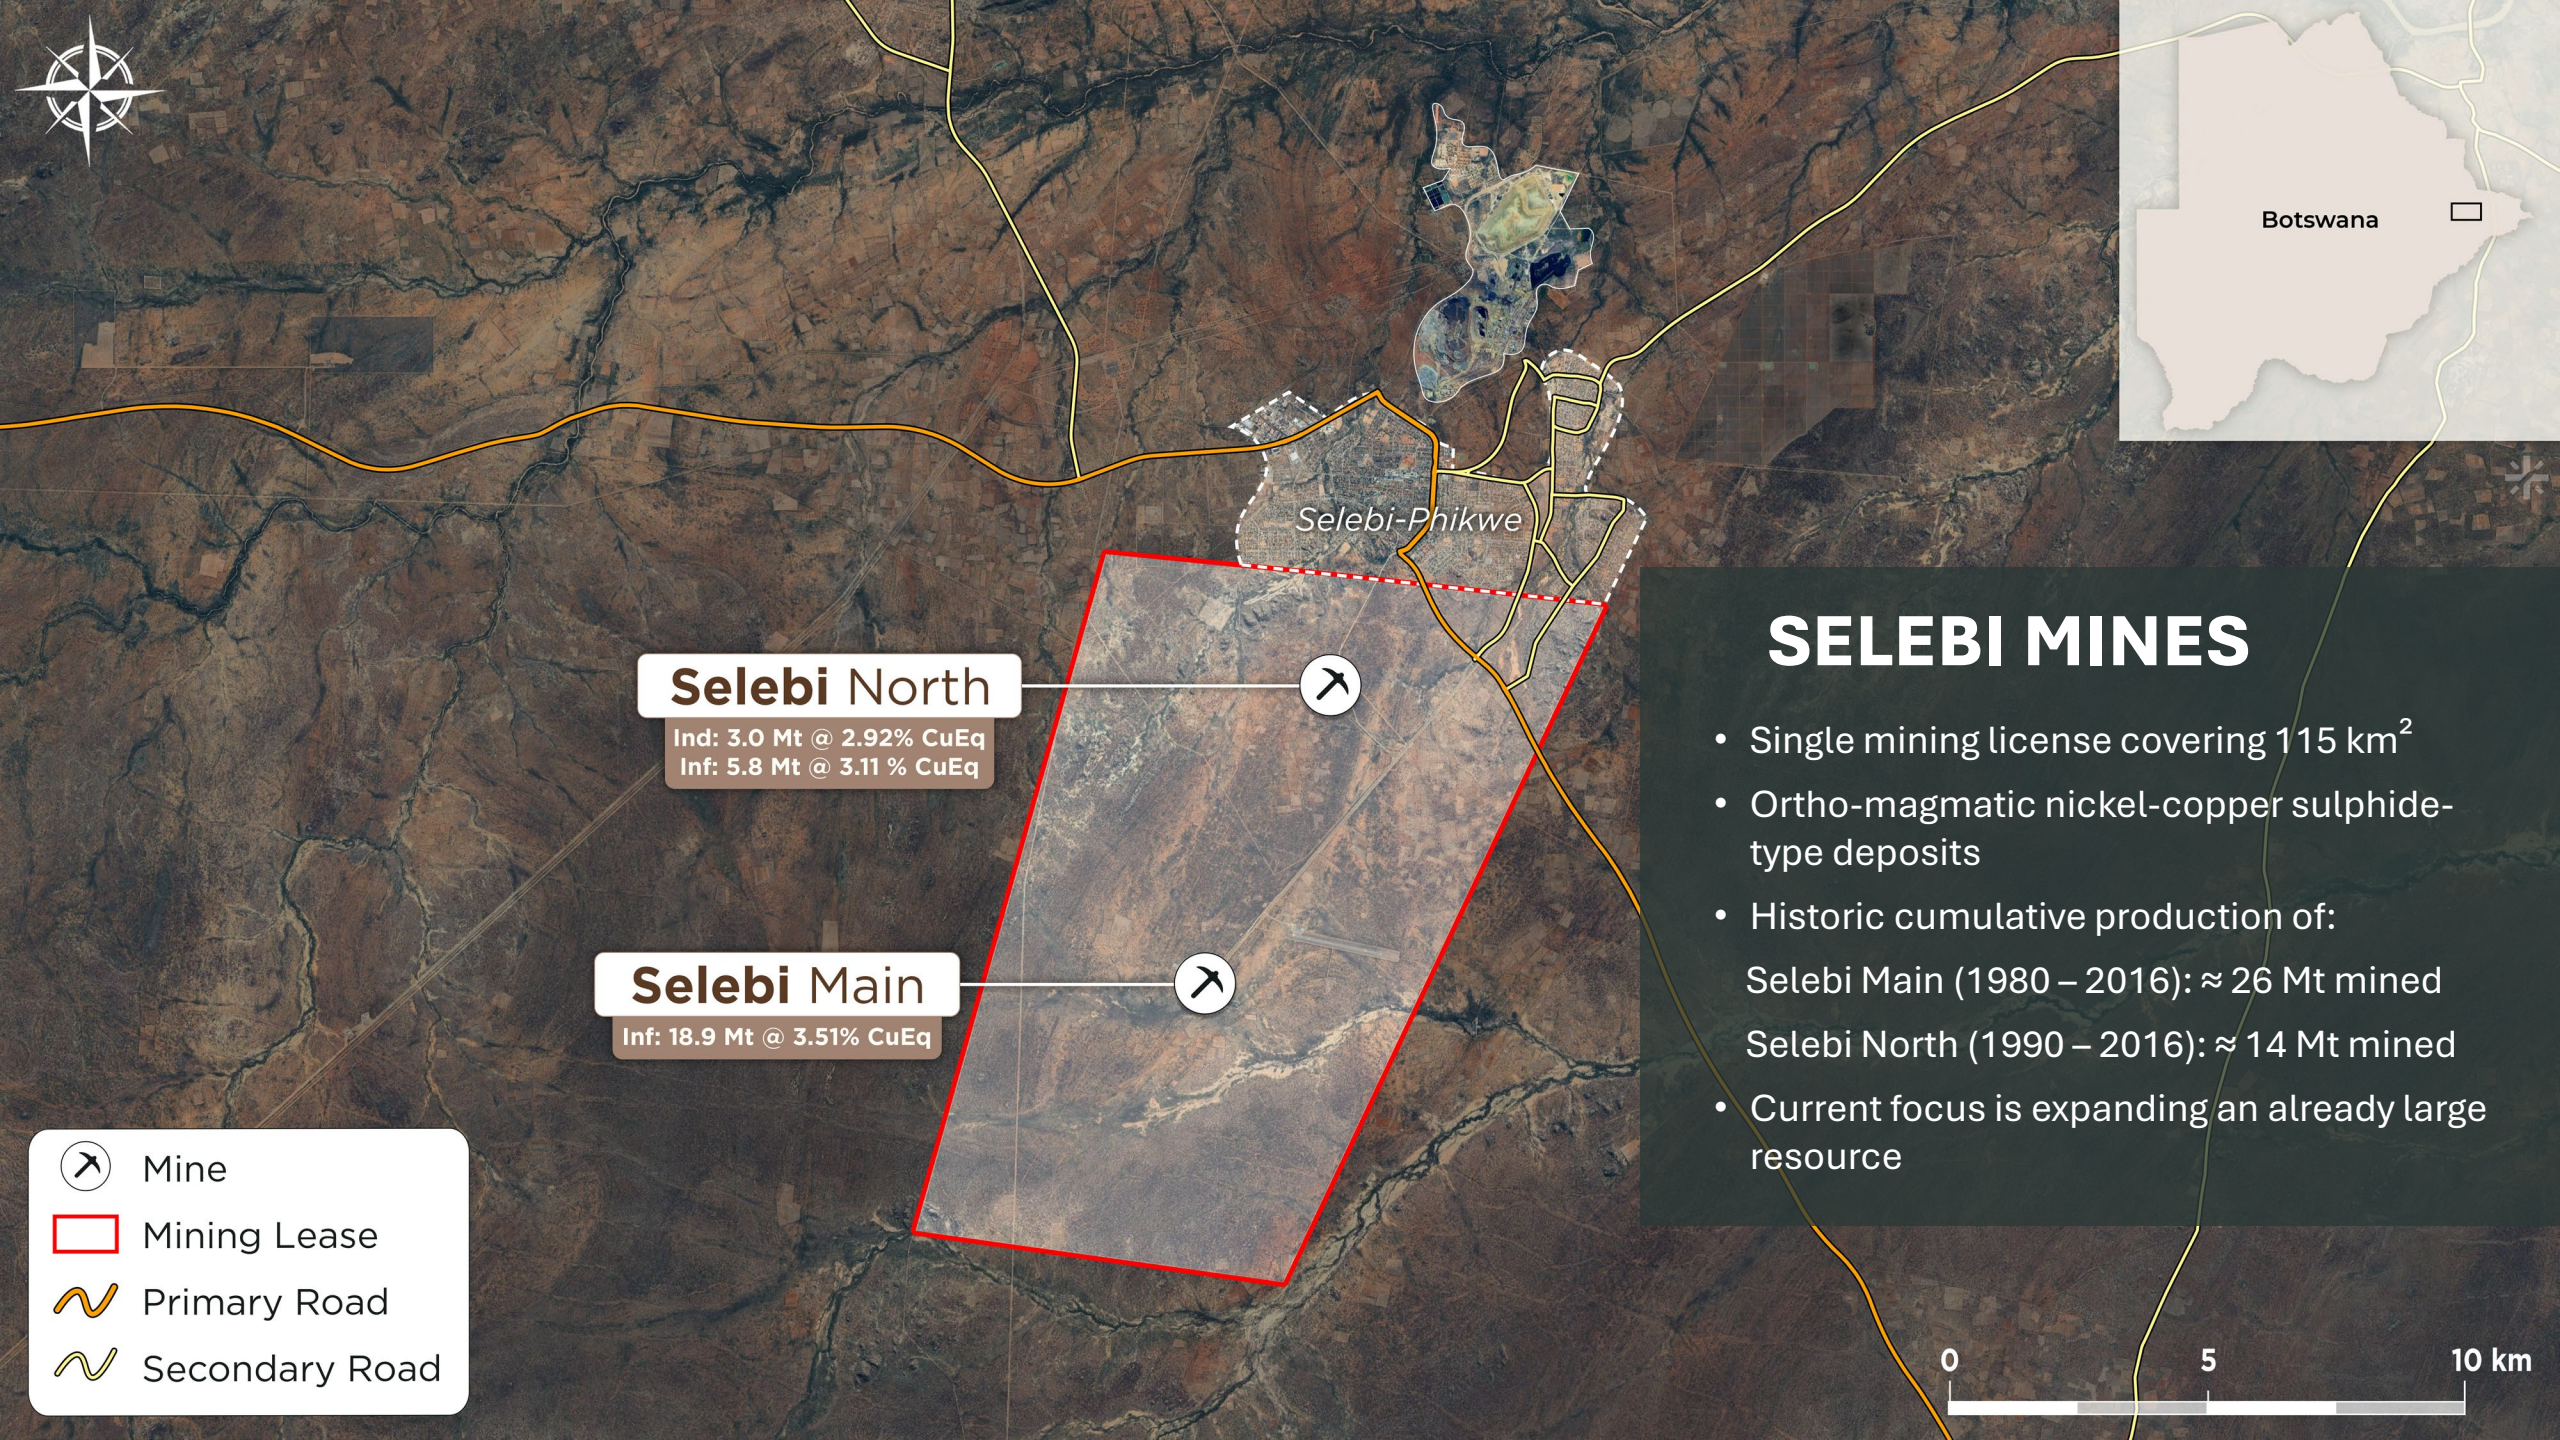

# A FOUNDATION DECADES IN THE MAKING

## MINE HISTORY

## NEXMETALS ERA

### Selebi North

Ind: 3.0 Mt @ 2.92% CuEq  
Inf: 5.8 Mt @ 3.11 % CuEq

### Selebi Main

Inf: 18.9 Mt @ 3.51% CuEq

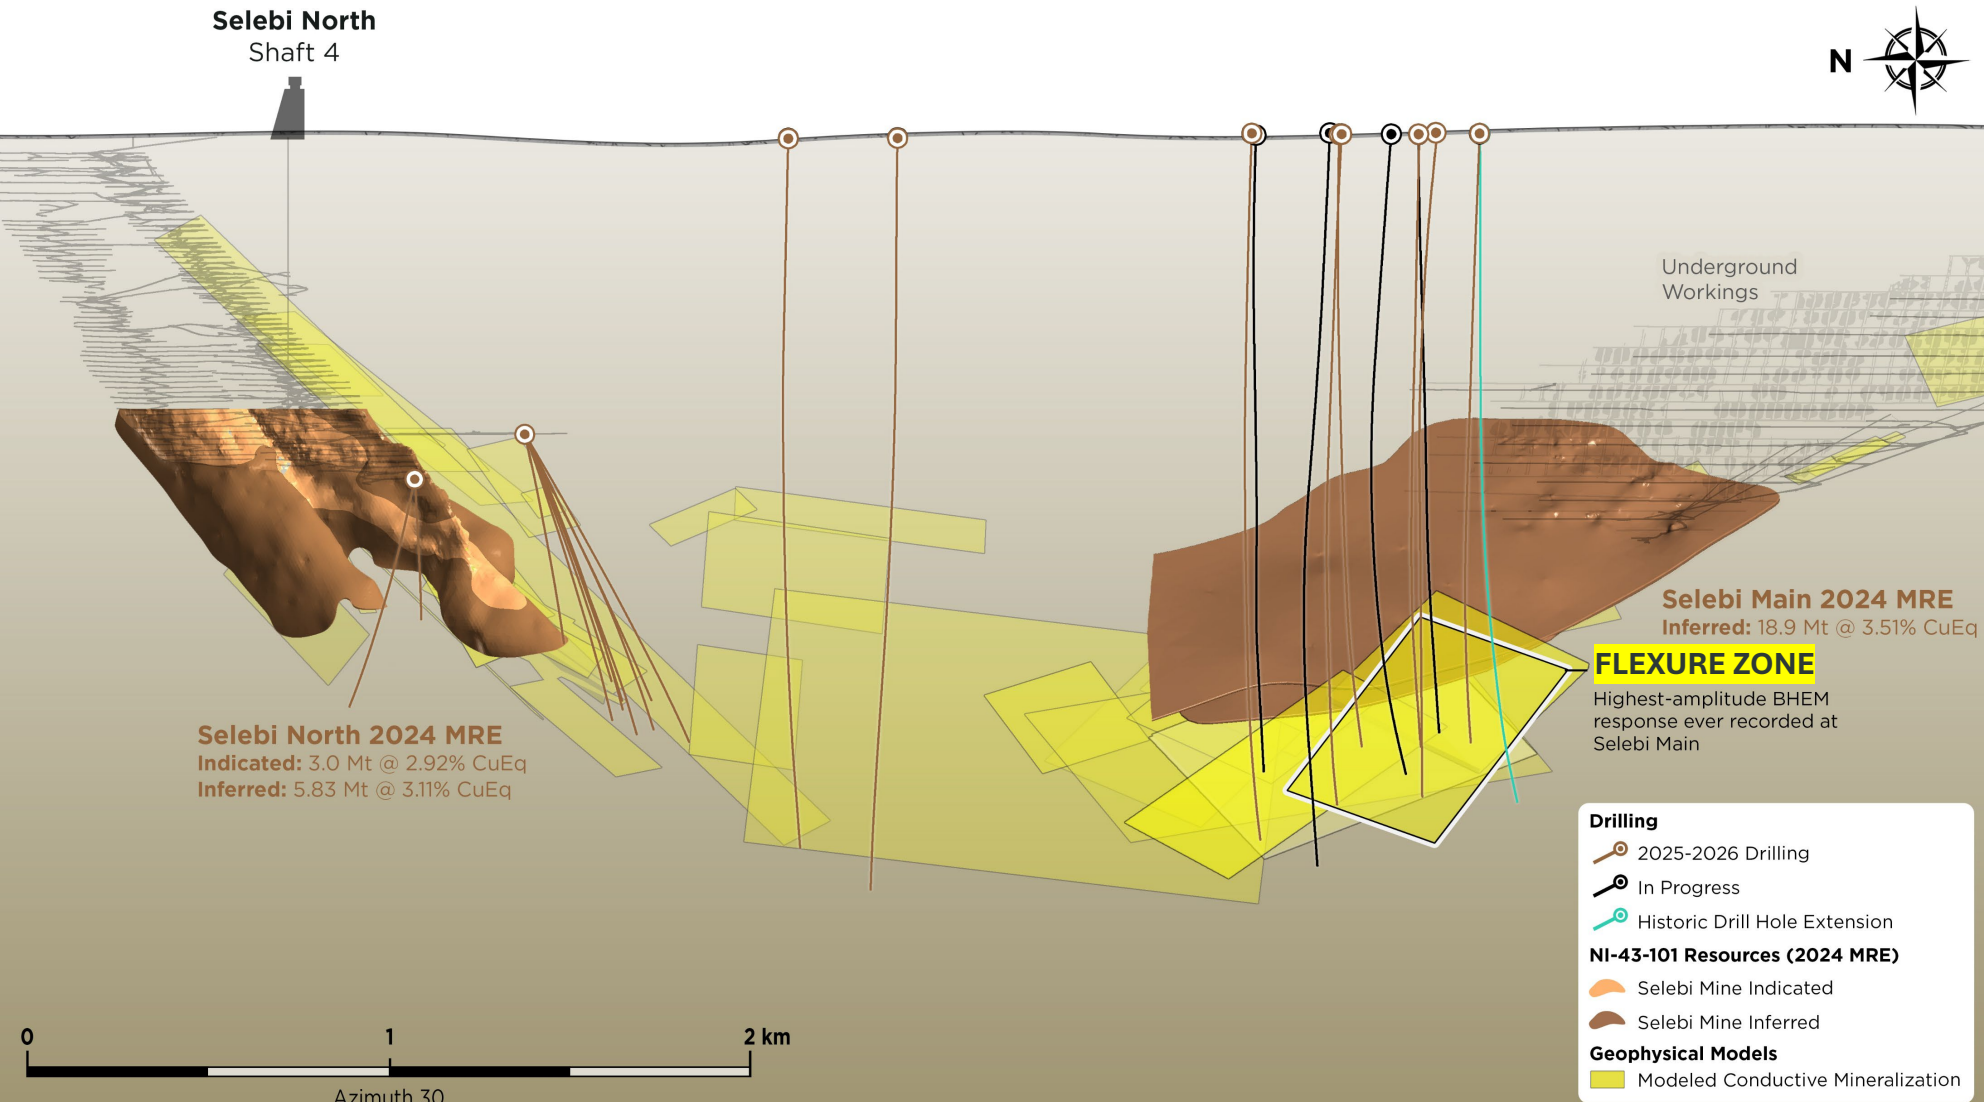

-  Mine
-  Mining Lease
-  Primary Road
-  Secondary Road

## SELEBI MINES

- Single mining license covering 115 km<sup>2</sup>
- Ortho-magmatic nickel-copper sulphide-type deposits
- Historic cumulative production of:
  - Selebi Main (1980 – 2016): ≈ 26 Mt mined
  - Selebi North (1990 – 2016): ≈ 14 Mt mined
- Current focus is expanding an already large resource

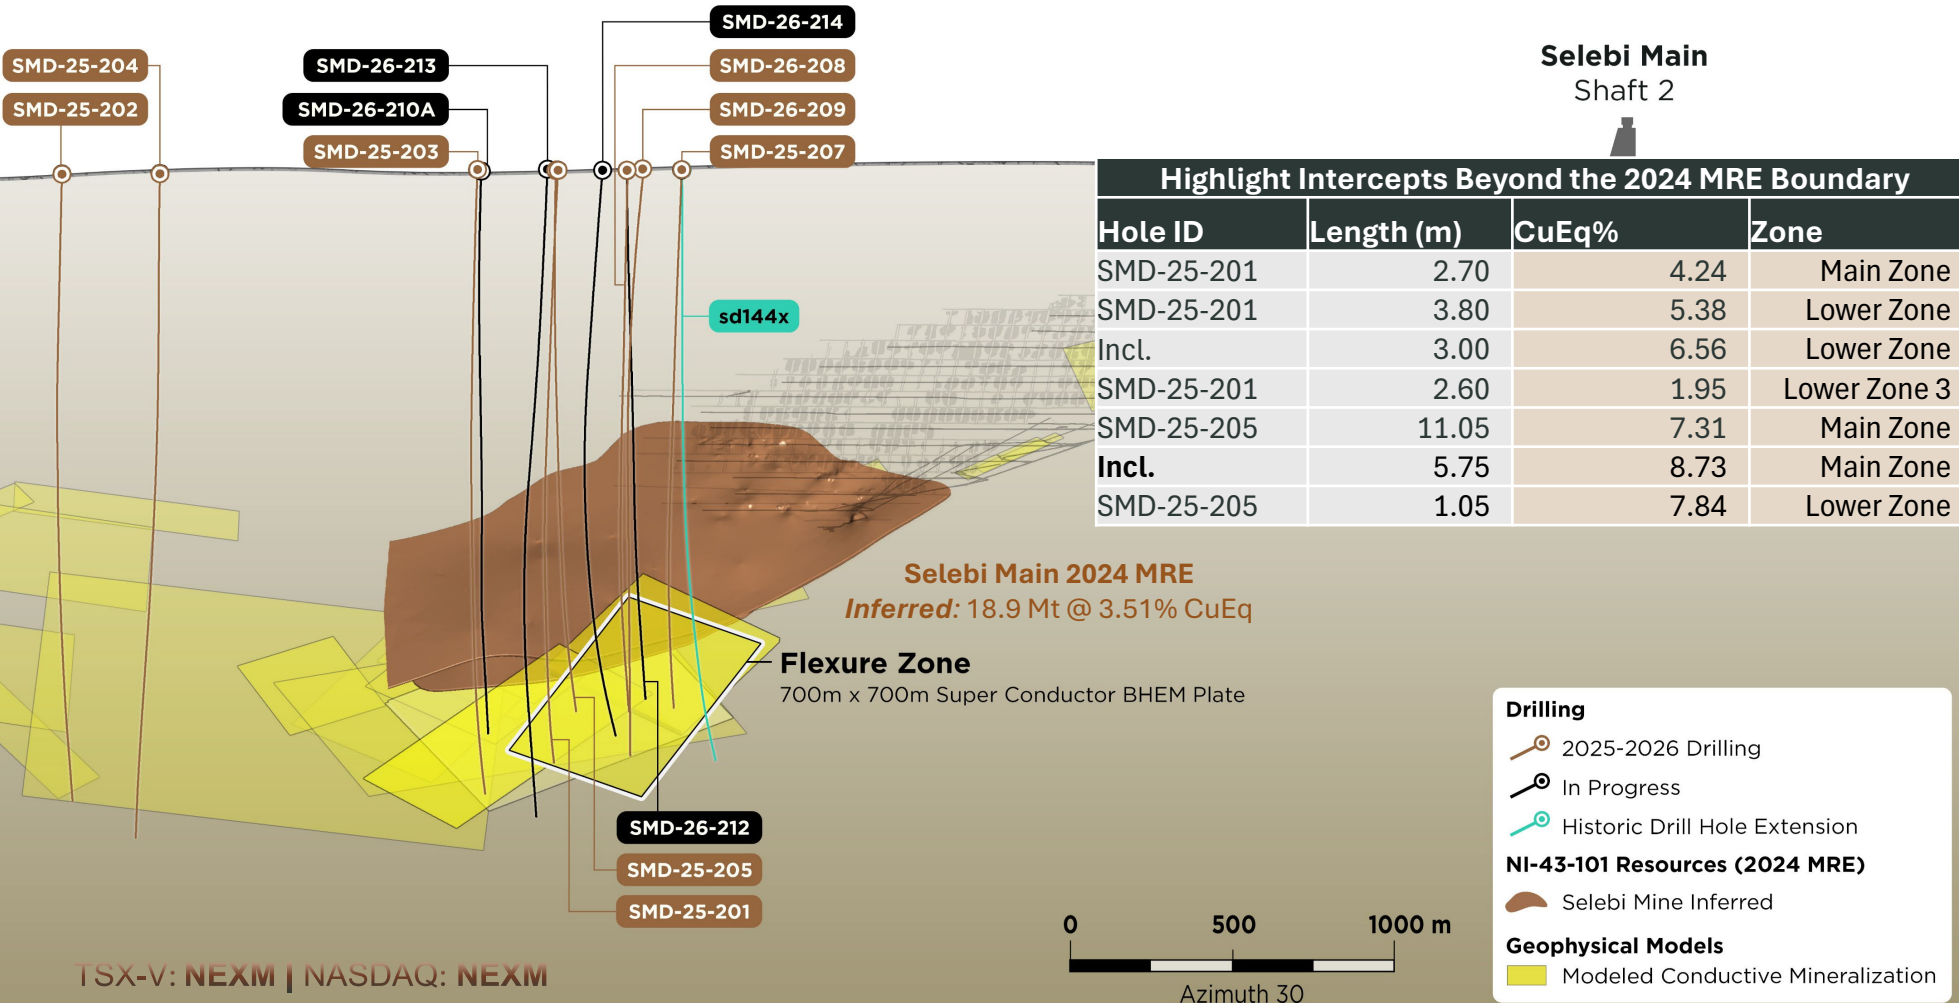

# DATA-DRIVEN MODELING AND DRILLING CONFIRM EXPANSION POTENTIAL BEYOND THE 2024 MRE ACROSS BOTH DEPOSITS

- Multiple untested borehole electromagnetic (BHEM) conductors and infill drilling highlight significant growth potential
- 2025 underground and surface drilling programs confirmed mineralization beyond the 2024 MRE, supporting a planned updated 2026 MRE
- Geophysical responses below and beyond the current resource suggest additional mineralization potential

# SURFACE DRILLING ADVANCES THE FLEXURE ZONE AS KEY DRIVER OF POTENTIAL RESOURCE GROWTH

FOUR DRILL RIGS ARE CURRENTLY ACTIVE WITH A FIFTH RIG BEING ADDED

- ~30,000 metre ongoing, leveraging 2025 drilling and BHEM results
- Priority targeting focused on the emerging Flexure Zone
  - Record “Super Conductor” BHEM response
- Drilling designed to expand mineralization and generate the geological data to support an updated Mineral Resource Estimate
- Results expected to inform future economic studies, including planned PEA in H2 2026
- Metallurgical studies to support ongoing flowsheet optimization

# UNDERGROUND DRILLING CONFIRMS SCALE AND CONTINUITY ~315 METRES BEYOND THE 2024 MRE

- 9,656m completed in 11 completed holes and 6 abandoned holes
- Extended the South Limb ~315m down-plunge, increasing the plunge extent of South Limb by ~35%
- Deeper drilling indicates improving copper grades at depth

Core Photos available at <https://nexmetalsmining.com/selebi-core-samples/>

# SELEBI MINES METALLURGICAL BREAKTHROUGH

## UNLOCKING ABILITY TO PRODUCE SEPARATE HIGH-GRADE SALEABLE COPPER & NICKEL-COBALT CONCENTRATES

### KEY POINTS:

- Largest underground bulk sample from Selebi Mines with representative material selected for metallurgical testing.
- Proven Technology – Locked Cycle Flotation (LCT) simulates full-scale plant performance with optimization underway.
- High-quality, saleable concentrates:
  - Copper concentrate achieved **27.6% Cu** grade, with **87% Cu** recovery.
  - Nickel concentrate at **10.5% Ni**, **0.59% Co**, with **56% Ni** recovery & **65% Co** recovery.

### BULK SAMPLES – REAL WORLD TEST MATERIAL

### STRATEGIC ADVANTAGE:

- Two separate saleable concentrates
- Multiple offtake pathways
- Lower CAPEX/OPEX
- Smaller footprint

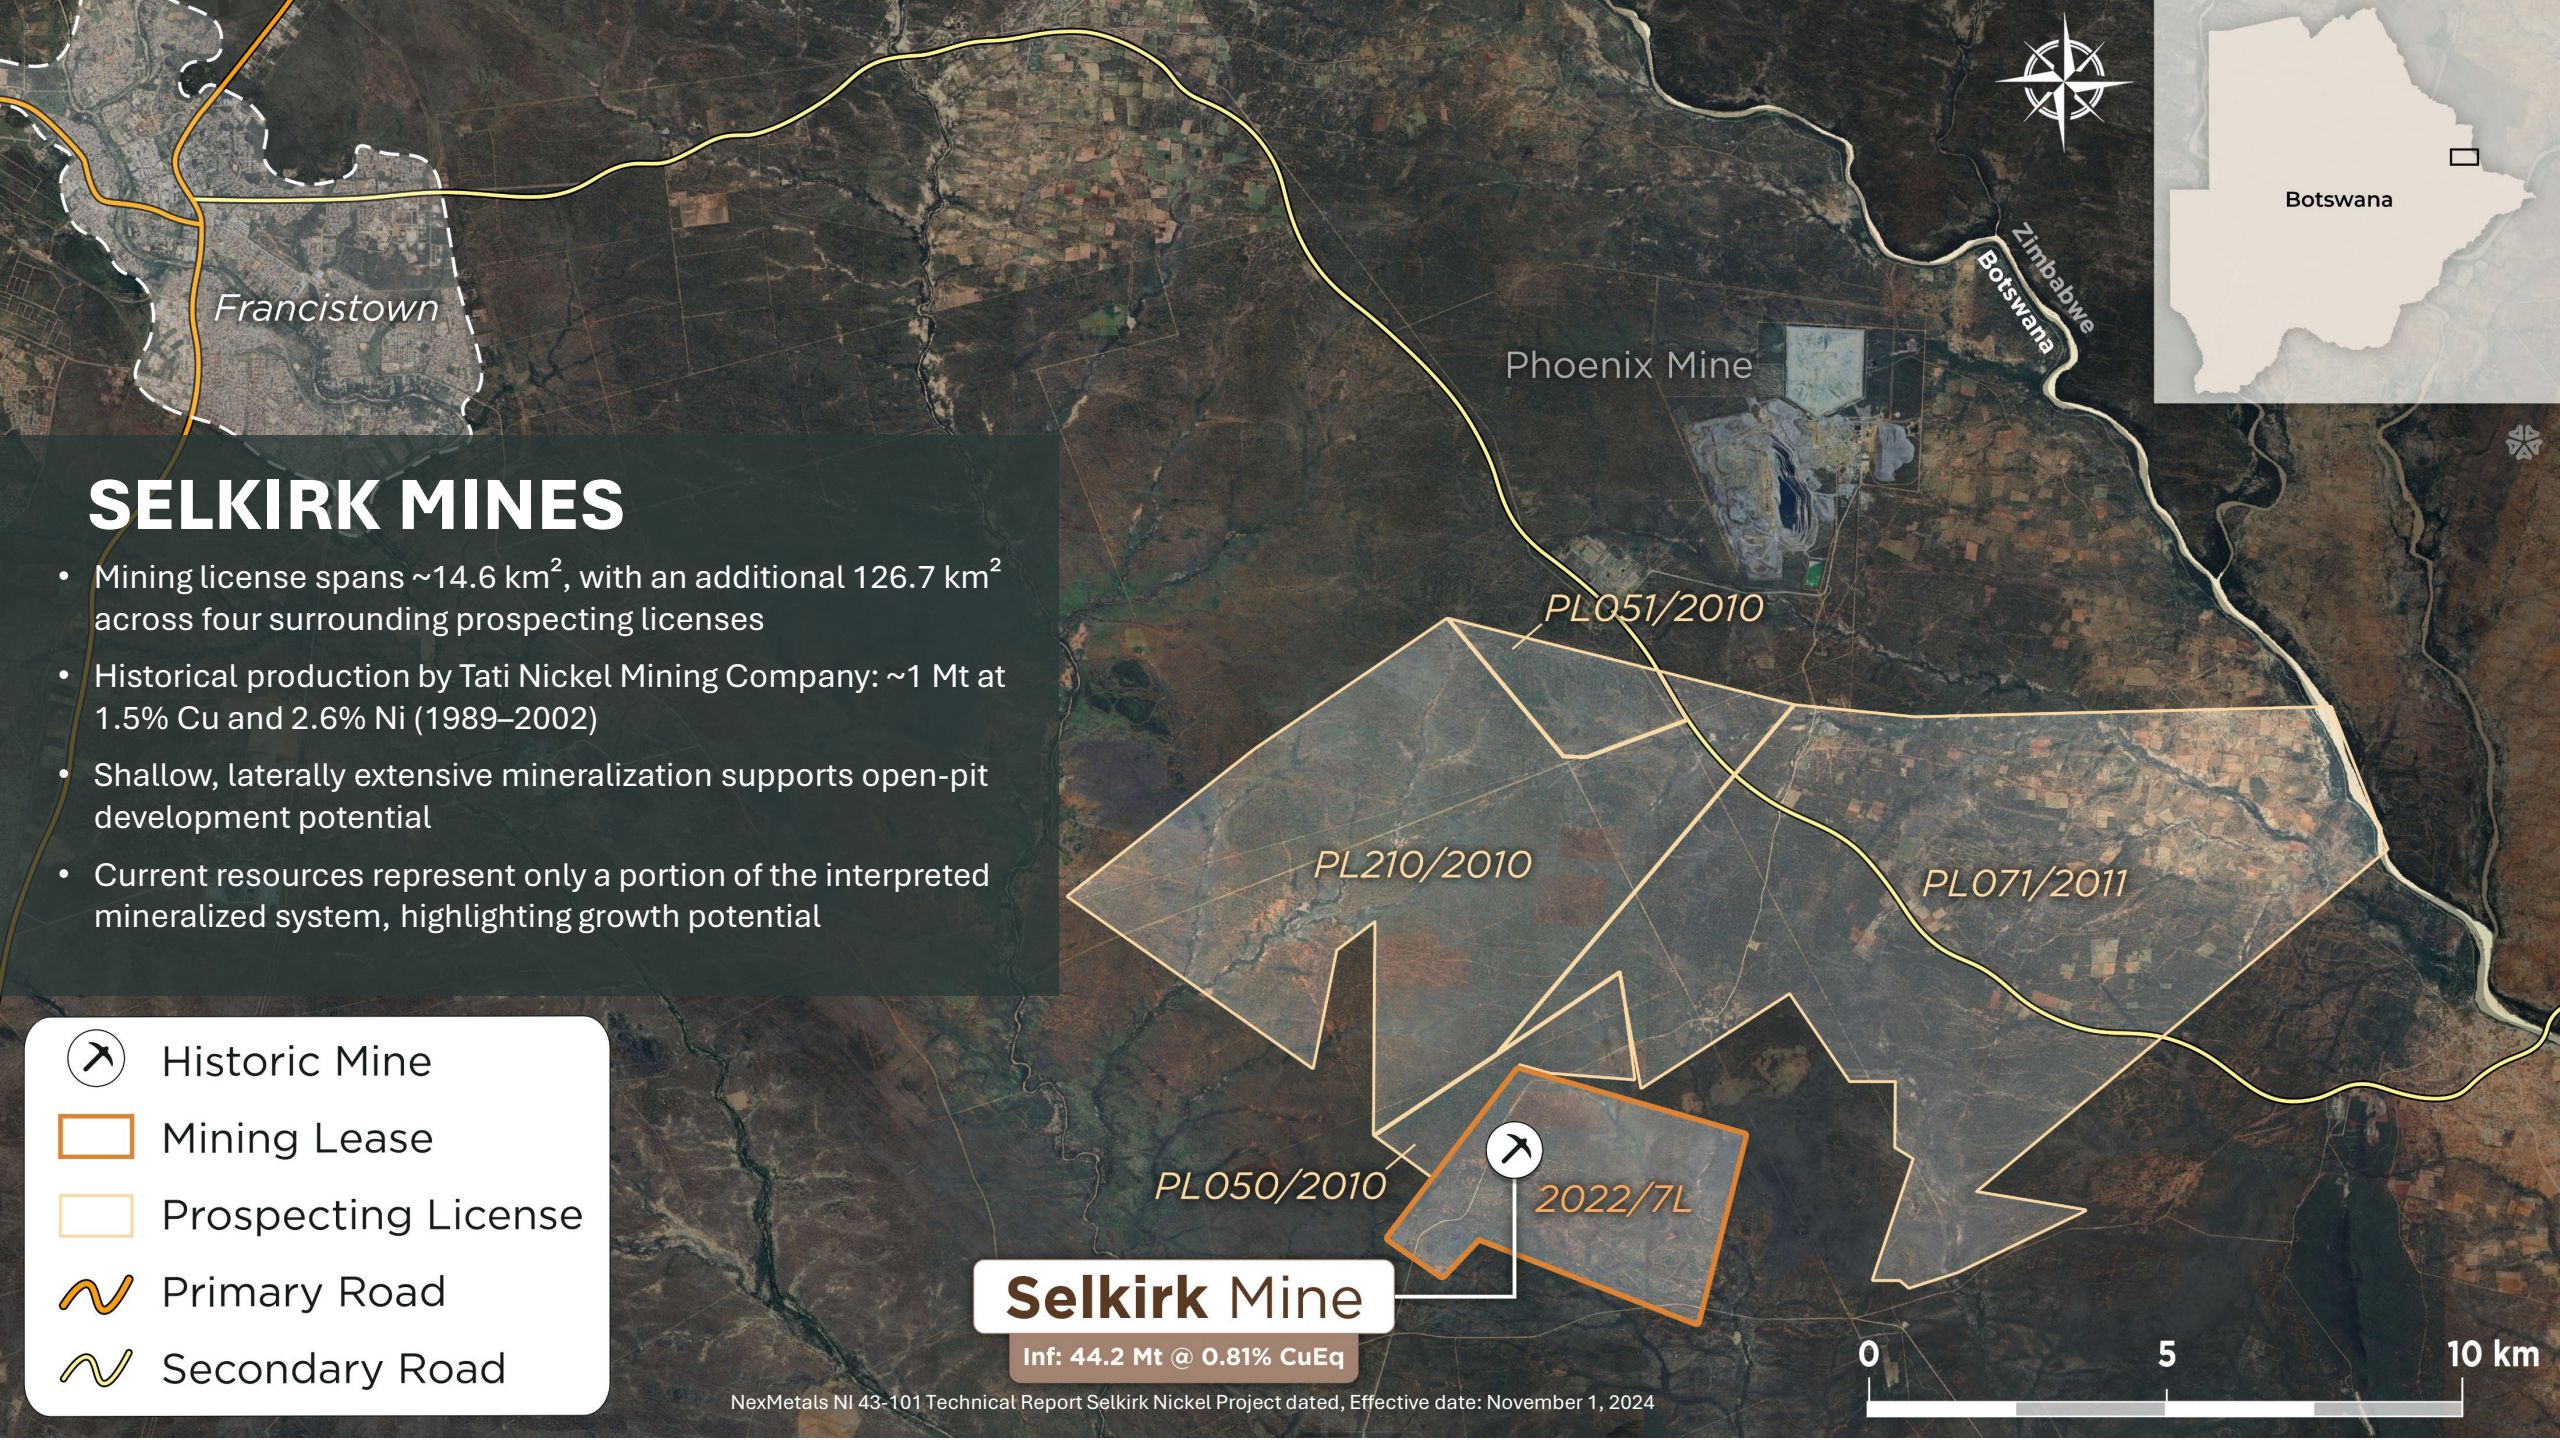

Product	ASSAYS					RECOVERIES (%)

# SELKIRK MINES

- Mining license spans ~14.6 km<sup>2</sup>, with an additional 126.7 km<sup>2</sup> across four surrounding prospecting licenses
- Historical production by Tati Nickel Mining Company: ~1 Mt at 1.5% Cu and 2.6% Ni (1989–2002)
- Shallow, laterally extensive mineralization supports open-pit development potential
- Current resources represent only a portion of the interpreted mineralized system, highlighting growth potential

Historic Mine

Secondary Road

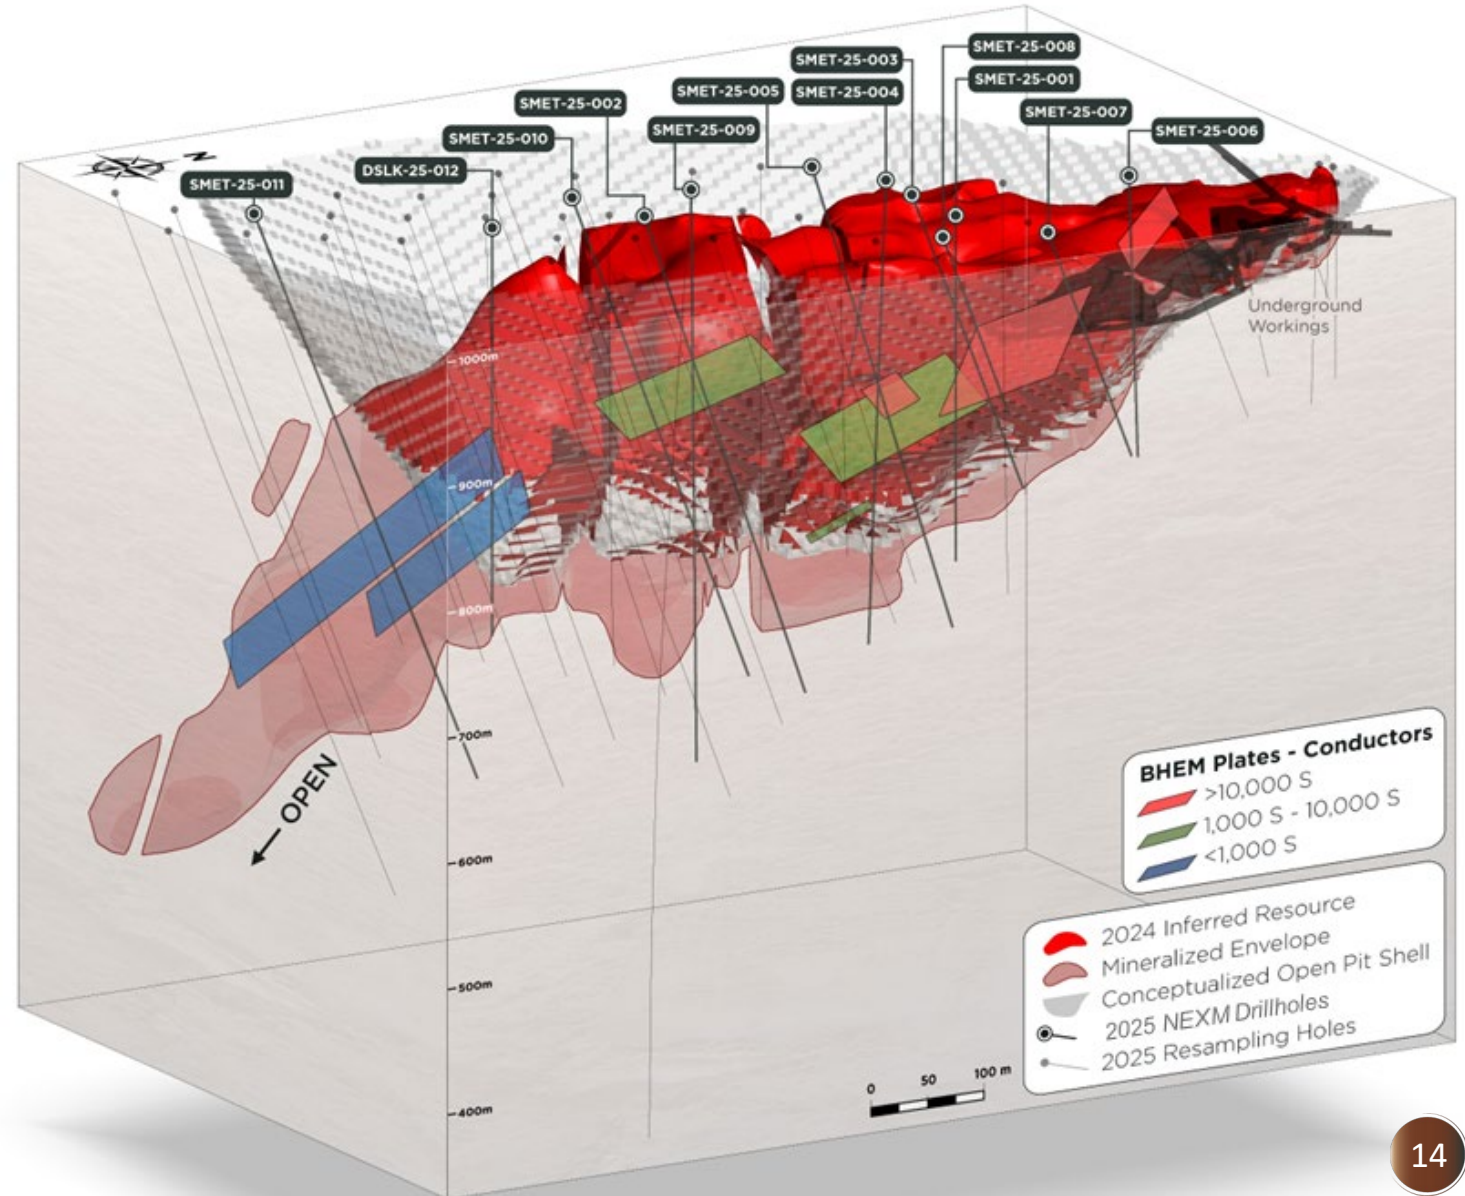

## Selkirk Mine

Inf: 44.2 Mt @ 0.81% CuEq

# OPEN-PIT POTENTIAL WITH SIGNIFICANT PGE EXPOSURE

- 34-hole resampling program complete; results confirm thick, consistent mineralization (e.g., **DSLK211: 180.8 m @ 1.31% CuEq**)
- High-grade footwall zones identified, adding exploration potential
- New PGEs analyses have potential for meaningful incremental resource growth
- Updated Mineral Resource Estimate targeted for Q2 2026

As announced on April 27, 2026

## VALIDATED PROCESSING PATHWAY

- Initial Locked Cycle Tests confirm ability to produce separate copper and nickel concentrates, providing an alternative to bulk concentrate production

## KEY RESULTS

- 81% Cu recovery** at 30.2% Cu grade; **10.9% Ni** concentrate at 54.4% recovery
- Compared to 2024 MRE:** Cu recovery **+16%**, Cu losses to tailings **-56%**, Ni concentrate grade **+60%**

## ADDITIONAL VALUE POTENTIAL

- PGEs, gold, silver, and cobalt now being evaluated — first time silver and cobalt assessed at Selkirk

## ADVANCING TOWARD NEW MRE

- Re-sampling complete; updated Selkirk MRE underway, expected **Q2 2026**

# POSITIONED FOR VALUE REALIZATION IN 2026

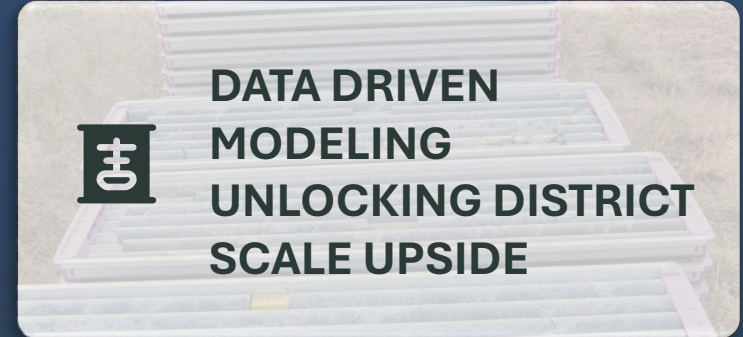

**RESOURCE GROWTH**

**ECONOMIC OPTIMIZATION**

**DATA DRIVEN MODELING  
UNLOCKING DISTRICT  
SCALE UPSIDE**

2026

## SELEBI

- ✓ Completion of underground drilling at Selebi North
- Ongoing surface drilling and BHEM targeting at Selebi Main
- Updated MRE
- PEA

## SELKIRK

- ✓ Completion of 34-hole resampling program
- ✓ PL Exploration program
- ✓ Metallurgical testing and flowsheet optimization
- Updated MRE

## EXPERIENCED DISCOVERY FOCUSED OPERATORS

# MANAGEMENT

### Sean Whiteford

CEO & Director

- 30+ years in global mining, with multi-commodity expertise across exploration, mining, and project studies.
- Held senior roles at BHP, Rio Tinto, and Cliffs, and led business development at Burgundy Diamond Mines (ASX: BDM).
- AMP graduate (Columbia Business School); Member of AUSIMM, PDAC, and SEG.

### Brett MacKay

CFO & SVP Finance

- 18 years in mining finance, including senior roles at Lundin Mining
- Expertise in technical accounting, complex corporate structures, financial and sustainability reporting, capital project controls, and international integration
- Strong leadership in budgeting, treasury, and strategic planning; CPA, CA

### Boris Kamstra

COO

- 25+ years in mining leadership, with a career focused in Sub-Saharan Africa.
- Former CEO of Alphamin Resources (TSXV: AFM), led the development of its \$1B+ tin mine in North Kivu, DRC.
- BSc Civil Eng. (cum laude) from UCT and MBA (Dean's list) from WITS; member of SAIMM.

### Sharon Taylor

VP Geophysics

- 35+ years in mineral exploration, including 13 years with Falconbridge, Noranda, and Xstrata.
- Extensive VMS and nickel experience in major: Sudbury, Raglan, and Kabanga, Kidd Creek and Bathurst.
- Specialist in EM data interpretation, integrating airborne, ground, and downhole methods.

### David Eichenberg

VP Geology

- 28+ year global mining geoscientist, having held key operational roles in De Beers and senior technical roles in Rio Tinto, including serving as Chief Geoscientist and QP at Diavik Diamond Mine.
- Expertise in open-pit and underground geology, mine reconciliation and resource expansion projects.

### Nisha Hasan

Investor Relations

- 20+ years in investor relations
- Founder & Principal of NH IR Advisory Corp., providing strategic investor relations and corporate communications to public and private companies across the mining sector

### Kneipe Setlhare

President, NEXM Botswana

- 14+ years in mining operations, with experience at BCL Mines, Discovery Metals, and Giyani Metals Corp.
- Currently Country Director at NexMetals Mining Botswana, based in Gaborone.
- Expertise across early-stage exploration, feasibility, development, and M&A of mine assets.

### Tidimalo Tito

GM, NEXM Botswana

- 24+ years in mining, diamonds, and coal; career start at BCL, senior leadership at Debswana and Morupule Coal
- Expertise in mine development, operations, and project commissioning
- B.Eng. (Hons) Mining, Camborne School of Mines; MDP, Univ. of Cape Town

TRUSTED AND EXPERIENCED

# BOARD OF DIRECTORS

**Paul Martin**

**CHAIRMAN**

Over 30 years of executive leadership in mining, including CEO and CFO roles at major TSX- and NYSE-listed companies.

**Sean Whiteford**

**CEO & DIRECTOR**

30+ years of global mining expertise across exploration, mining, and project studies, including senior roles at BHP, Rio Tinto, and Cliffs.

**Chris Leavy**

20 years of asset management and investment leadership, including CIO roles at Oppenheimer Funds and BlackRock.

**Jason LeBlanc**

20 years of mining finance and capital markets experience, including CFO leadership and major M&A transactions.

**Mark Christensen**

30 years of capital markets experience, including senior leadership roles at GMP Securities and founder of KES 7 Capital.

**Jim Gowans**

30 years of senior executive and board leadership in the global mining industry, including CEO roles at major companies.

**Warwick Morley-Jepson**

Over 40 years of mining leadership, including executive roles at Kinross Gold and Ivanhoe Mines and Chairman of Wesdome Gold Mines.

**Philipa Varris**

Over 25 years of ESG leadership in mining across Africa, Australasia, and Latin America, with executive roles at Oryx, Horizonte, and Golden Star Resources.

**André van Niekerk**

23 years of mining industry leadership, including CFO roles at Gatos Silver, Nevada Copper, and Golden Star Resources.

# THE NEXT MAJOR CRITICAL METALS PLAYER

## PERMITTED & PROVEN:

Past-producing Cu-Ni-Co-PGE  
Mines

## EXPLORATION UPSIDE:

Untested EM plates along 2 km  
corridor between and below Selebi  
North & Main and emerging Flexure  
Zone - major discovery potential.

## TIER-ONE JURISDICTION:

Botswana – safe, stable, mining-  
friendly. Established mining region  
with experienced local talent.

## BUILT-IN ADVANTAGE:

Two shafts, grid power, water, rail  
& road infrastructure reduce  
restart cost and timeline.

## RESOURCE READY WITH GROWTH POTENTIAL:

Selebi: 24.7 Mt Inferred @ 3.40%  
CuEq and 3.0 Mt Indicated @  
2.92% CuEq  
Selkirk: 44.2 Mt @ 0.81% CuEq

## GLOBAL SOURCE OF CRITICAL METALS:

Copper, Nickel, Cobalt & PGEs –  
Securing supply in an era of declining  
new discoveries of critical metals.

## FUTURE PRODUCTION POTENTIAL:

Fast-track path to development with  
lower-cost processing options  
proven by metallurgical & XRT  
results.

## PROVEN LEADERSHIP WITH FINANCIAL BACKING:

Leadership that delivers –  
backed by results

# ESG COMMITMENT & IMPACT

We are committed to a sustainable future, aligning with ESG principles to drive economic prosperity, protect the environment, and enrich our communities. Advancing responsible mining, promoting innovation, and ensuring a brighter future for Botswana and its people.

## Economic Prosperity

- Restarting the mines will create stable employment opportunities.
- Contributing to vital government services.
- Fostering local businesses and growth.

## Environmental Stewardship

- Investing in clean energy, reducing emissions.
- Cutting-edge tech for minimal environmental impact.
- Responsible resource management.

## Community Enrichment

- Ensuring a safe work environment.
- Investing in development and innovation.
- Safeguarding cultural legacy.
- Collaborative alliance with stakeholders

Inferred	Selebi Main	18.9	1.69	0.88	319	165
	Selebi North	5.8	0.90	1.07	52	62
	<b>Total</b>	<b>24.7</b>	<b>1.50</b>	<b>0.92</b>	<b>371</b>	<b>227</b>

## Notes:

1. CIM (2014) definitions were followed for mineral resources.
2. Mineral resources are estimated at a NSR cut-off value of \$70/t.
3. Mineral resources are estimated using long-term prices of US\$10.50/lb Ni and US\$4.75/lb Cu and a US\$: BWP exchange rate of 1.00:13.23.
4. Mineral resources are estimated using nickel and copper recoveries of 72.0% and 92.4% respectively, derived from metallurgical studies which consider a conceptual bulk concentrate scenario.

5. Bulk density has been estimated and averages 3.39 t/m<sup>3</sup> at Selebi Main and 3.60 t/m<sup>3</sup> at Selebi North.
6. Mineral resources are reported within conceptual underground reporting shapes considering a minimum thickness of 1.5 metres.
7. There are no mineral reserves.
8. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
9. Totals may not add or multiply accurately due to rounding.

# INITIAL NI 43-101 MINERAL RESOURCE ESTIMATE ON THE SELKIRK MINE

Classification	Grade						Contained Metal			
	Tonnage (Mt)	Cu %	Ni %	Pd g/t	Pt g/t	CuEq* %	Cu kt	Ni kt	Pd koz	Pt koz
Inferred	44.2	0.30	0.24	0.55	0.12	0.81	132	108	775	174

\*CuEq% calculated using the formula  $Cu\% + Ni\% \times (55.605/53.913) + Pd\ g/t \times (22.948/53.913) + Pt\ g/t \times (14.891/53.913)$  using metal prices and recoveries listed below in Notes.

#### Notes:

1. CIM (2014) definitions were followed for mineral resources.
2. Mineral resources are estimated at a NSR cut-off value of \$25/t.
3. Mineral resources are estimated using long-term prices of US\$10.50/lb Ni, US\$4.75/lb Cu, US\$1,450/oz Pt and US\$1,500/oz Pd, and a US\$: BWP exchange rate of 1.00:13.23.
4. Mineral Resources are estimated using nickel, copper, palladium, and platinum recoveries of 60%, 70%, 59%, and 59%, respectively, derived from metallurgical studies which consider a conceptual two concentrate scenario.
5. Bulk density has been estimated.
6. Mineral resources are reported within an optimized pit shell.
7. There are no mineral reserves.
8. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
9. Totals may not add or multiply accurately due to rounding.
